

Ward	Title	Name of Organisation/ Applicant	Project Description	CIL requested £
Clifton	Mural restoration	Hotwells Primary School	We will restore the landmark "Green" mural with the original artist, revitalising the astroturf playground to encourage active outdoor play. Simultaneously, a new indoor mural will transform the Main Hall into an inspiring space for drama and assemblies, fostering pupil confidence and creating a professional environment for local community hirers.	£5,000.00
Clifton	Sound cloud installation	Hotwells Primary School	We propose the installation of professional-grade acoustic "sound clouds" (suspended baffles) in the Main Hall and two key classrooms. This specialised infrastructure will neutralise echoes and significantly improve speech clarity. By treating two classrooms, we ensure the pupil can move through the school year-groups with his peers, rather than being confined to a single "quiet" room for his entire primary journey. Furthermore, the Hall improvements will benefit the whole school during drama productions and assemblies, while making the space more viable for community hire and local groups	£20,000.00
Clifton	Garden restoration	Hotwells Primary School	We will transform the garden into a high-quality vocational and sensory learning hub. By installing sensory plants and repainting the area, we provide a therapeutic space for students to gain practical horticultural skills. While internal to the school, the restoration offers a significant visual improvement for the neighborhood to enjoy..	£1,000.00
Clifton	Main hall drape installation	Hotwells Primary School	We propose installing high-specification acoustic drapes on a comprehensive rail system around the hall. This will dampen sound, transform the room into a multifunctional performance space, and create a professional environment. These drapes will enable high-quality drama productions, boost pupil confidence, and increase the hall's viability for community hire	£13,000.00
Clifton	Repointing Hotwells Primary School	Hotwells Primary School	We will undertake a comprehensive repointing of the entire school building using heritage-appropriate materials. This project will secure the building's structural integrity for the long term. By preserving this 170-year-old landmark, we ensure the school remains a safe, dry, and inspiring learning environment for current and future cohorts.	

Clifton Down	Upgrade to Accessible Toilet in the School's Reception Area for the Benefit of All Users	Bristol Old Vic Theatre School	We want to upgrade the toilet in our Reception area to make it fully accessible, gender-free and suitable for all members of our community. We would seek guidance on inclusive additions, which might include the introduction of touch-free facilities and locks, disability aids, a baby-change table and new inclusive signage.	£6,000.00
Clifton Down	Refurbishment of Redland Library within the existing shell, to use the building volume to create an additional floor and mezzanine	Friends of Redland Library	Redland Library is a very well used library, however, it is the only secular public space in the ward. The fact the library is just one hall, with minimal office space at the back, means it is very limited for use in other ways which could greatly benefit the community	£30,000.00
Clifton Down	Environmental Improvements to External Area of the community centre (Redland Club)	The Redland Club	A small landscaping project, introducing bicycle stands and provision of dedicated space for refuse bins. Improvements to areas surrounding fire escape and garage entrance – landscape design to include planting shrubs and elements to avoid fly tipping. (Maintenance and improvements to fire escape, walls and external car park is also required).	£20,000.00
Clifton Down	St Paul's Eco Arts Community Hub: Art installation to publicise and improve Mini Recycling Centre (MRC)	St Pauls Church, Clifton	Work with partners to engage members of the local community in our highly transient neighbourhood, to create a large eye catching art installation backing onto and surrounding the MRC. The key objectives are community engagement, circular economy awareness and greater ownership of shared space.	£12,000.00
Clifton Down	New sign for slowing cyclists to warn of school children	St Peter and Paul Primary	Kids are almost being hit by cyclists going up the one-way road (The wrong way) unaware of a school. A new slow down sign for cyclists warning of a school with crossing kids. Also a sign on Hampton Road.	
Cotham	Chandos Road Public Realm and Environment Improvements - Bins	Chandos Neighbourhood Association	The area is densely populated and has many restaurants and bars. With crowds of consumers there are insufficient facilities for waste. Streets off Chandos Road suffer from littering, partly due to the high density of HMOs. The entire area has only one small bin which is almost permanently overflowing. We are asking for six upgraded waste bins like those found in the city centre to improve public hygiene and pest control. We need two more on Chandos Road, including one replacing the existing bin, plus three at the end of the side streets, eg. on Kensington Road.	£5,000.00

Cotham	Chandos Road Public Realm and Environment Improvements - bike racks and planters	Chandos Neighbourhood Association	Chandos Road is a busy neighbourhood and thriving hub of restaurants and bars. The pavements are narrow and often blocked. The public space is cluttered. There is no facility for cycle storage; cycles are often tied to trees, railings and lampposts, causing obstruction. These issues reduce accessibility for pedestrians. To facilitate use and enjoyment by the many elderly and disabled residents plus parents with small children, we request enhancement of public space with seats and planters. Also, we need cycle racks installed in suitable places. This plan fits with the council's desire to make Bristol more cycle friendly.	£20,000.00
Cotham	Cotham post-16 well-being hub	Cotham School	To fully refurbish and equip a space in our building (a former toilet block and current empty shell) to the highest possible standard, giving every student a chance to feel safe, seen, and supported. We have worked with contractors to provide a cost-efficient quote for the installation of floors, walls windows, doors and a rooms partition. In addition, full electrical and IT installation will need to be completed. Finally, the furnishing and kitting out of the space with the resource to fulfil the ambitions of the project	£35,000.00
Hotwells & Harbourside	Dropped Kerbs Rownham Mead-Improving Access and Mobility	Rownham Mead Residents	The proposal is to install pairs of drop kerbs in three specific locations in the BS8 4Y area of the estate.	TBC
Hotwells & Harbourside	Harbour Helpers: a network of physical noticeboards or signs to help communicate seasonal ecological knowledge and know-how	Ian House	By adding a network of information panels we will enable a transfer of knowledge, such as the seasonal behaviour of native and migrating bird species, too and from the visiting public. The information will raise awareness through active participation, leading to improved environmental caretaking and accountability.	£5,000.00
Hotwells & Harbourside	Interactive Public Art Installation in Albion Yard	Puppet Place Trust Ltd	We propose an interactive artwork that invites curiosity and participation. Providing a focus point for visitors to Albion Yard's Creative Quarter and a memorable enhancement of its public realm, the sculpture will be educational, a wayfinding signpost, and a playful reminder of over 200 years of marine engineering history.	£17,250.00

Hotwells & Harbourside	Cathedral Walk Natural Features	Bristol BID	Propose to build natural play features to this small grassy park which is now being managed by BCC rather than the Developer. Propose to add logs, wooden slides and balancing play to this area which can be added to as funding increases. This could also be a pilot of a new way of delivering children's play sustainably using logs from trees removed by BCC. See picture examples at the end of the document.	£12,000.00
Multiple wards	Improvements to Hotwells Corner and Dowry Square region.	Patrick Mcallister and Jerome Thomas	General transport improvements to help reduce traffic speeds, increase walkability and cyclability, improve air quality and enhance the area's aesthetic value.	
Multiple wards	Making Bristol Heart safe by preventing avoidable deaths from cardiac arrests	Great Western Air Ambulance Charity	To install more defibrillators in at-risk neighbourhoods, as identified by our strategic mapping tool which uses health and demographic data to identify areas most in need of a device.-To work within those communities to train local people in giving lifesaving CPR and using a defibrillator.	£5,000.00
