

Welcome to the seventh Bristol Joint Strategic Needs Assessment (JSNA) Bulletin of 2024/25, our regular update to let you know what new data sections have been recently released, and what's coming up.

Bristol JSNA Health and Wellbeing Profile 2024/25 – Latest updates

This month we are publishing 7 section updates. The JSNA updates are published by theme and then in alphabetical order – see: [JSNA Health and Wellbeing profile](#).

Please do get in touch if you have any comments on the webpages, data or JSNA profile structure - our contact details can be found at the end of the bulletin.

For our November edition we are pleased to report the following updated sections:

Long Term Conditions	Liver Disease Neurological conditions
Mental Health and wellbeing	Suicide deaths
Older People	Adult Social Care
Population	Births
Wider determinants	Social Isolation Special Educational Needs and Disability (SEND)

If you would like to know more about the JSNA in general and why it's produced please see our web-page [About the Joint Strategic Needs Assessment \(JSNA\)](#)

Other updates:

- The **BNSSG Healthier Together Knowledge Hub** signposts to useful information, evidence and data about people's health and wellbeing across Bristol, North Somerset and South Gloucestershire, including; who to contact for advice on data and evidence, how to access evidence from research, reports from public insights work and data from local surveys
- ONS have recently published the [rebased mid-2012 to mid-2020 population estimates](#) by output areas and other geographies for England and Wales
