Gsm unit+sim

stand alone
bed/chair kits.

Stand alone equipment see items 1-9

- For equipment linked to a pager to support a carer/relative/spouse living at same address see <http://www.easylinkuk.co.uk>
- Pager and sensor only items 8 & 9.

Telecare equipment Items 10-33 need a careline to operate.

- Telecare Equipment items 10-33 needs a careline (£3.50) and base unit (12-15) to support the telecare unless the person already has a careline and you are adding equipment. Remember Tunstall/Tynetech kit is designed to be linked to a careline. Is there a careline in place? Who is operating the careline? (It may not be Bristol City Council) Order same branded devices or they will not be compatible

	Product	Manufacturer/ Approx Cost	Application
	1) Magi-plug	£7.14	Models are available for bath, sink and hand basin. When an unattended bath / sink reaches a certain depth, the pressure plate opens and releases the excess water. 3 types, bath, kitchen sink, hand wash basin.
	Stand Alone	NRS	
	2) Memo-Minder	£29.95	Pre-recorded personal message played when device activated by movement. If movement continues to be detected the message will be played back every 20 seconds. Range of movement detection area can be reduced by masking part of sensor. The operating hours can be restricted by using a transformer power supply with timer in place of batteries.
	3) Memo-Minder + Transformer & Timer - Stand Alone	£44.95 Solon	
	4) Mem X - Stand Alone	£110.40 Pivo Tell	Mem-X is a voice memory aid designed for those with some memory loss. It tells the user in a pre-recorded voice all they have to do at that time, from special events to taking medication.

5) Memrabel II - £119.99

MemRabel II helps people to remember events and tasks by playing back recorded voice messages at programmed times.

Stand Alone Easylink

Prompt meds, digital photo frame, download video clips of friends and family. Can request that prompts are set up by Easylink if order as a special.

6) Home Safety Alert - £32.15

A wireless calling alarm system with one main receiver unit and two pendant calling transmitters. There is a Call button and Panic button on each pendant.

Stand Alone Life Max

7) Night Light with motion sensor - £18.99

Turns on when light or movement detected automatically. Emits bright and warm light. Manual on/off switch or automatic operation.

Stand Alone Life Max

Supplied with wall fixing bracket or just position on shelf, table or floor Detection zone up to 5 metres and 100 degrees.

	8) MPPL-MS TRANSMITTER	£33.60	New design MPPL-MS with on/off switch, power save, pulse PIR count, pager channel selection 1-2 and low battery warning transmitted to pager, pet safe mode. This kit can be used for bed leaving applications, wander detection and general security applications.
	Stand Alone	Easy Link	NB needs at least One of # 10 to work See Easylink Catalogue http://www.easylinkuk.co.uk/ for bed/chair kits, fall detectors and door contacts linked to a pager to support a carer/relative/spouse living at the same address.
	9) MPPL ALARM PAGER	£37.20	The MPPL is a robust radio pager with beeper and vibration alerts.
	Stand Alone	Easy Link	NB: Needs at least One of # 9 to work See https://www.youtube.com/watch?v=oh5VPadDna8 .

10) Bed/Chair
Occupancy
Sensor -

£70.00

The sensor is placed beneath the mattress (**2 required for double bed**) and is connected to a transmitter box (#32).

Used to alert of risk behaviour associated with bed exits at night.

Telecare

Tunstall

NB: Needs #33 and #13 or #14

Please specify if you need a bed or chair sensor, if to be fitted to a profiling bed, consider a stand-alone sensor and pager.

If it is a slatted bed please note on requisition as Tynetech's bed sensor is appropriate. Please advise if a memory foam mattress.

If considering a chair sensor, there is a cord attached to the sensor will this pose a hazard? Is it a riser/recliner chair the sensor could move out of place.

Chair needs a cushion to put the sensor mat under. May need to consider a wireless, cordless chair sensor linked to a pager if someone living in the same property can respond. (See Easylink uk link)

11) Bed Occupancy Sensor -

£169.51

Also used to alert of risk behaviour associated with bed exits at night. Similar in performance to # 11. Choice may depend on if the service user already has any of #13, #14, #15 or #16.

Telecare

Tynetec

NB: Includes #32 needs #15 or #16

12) Lifeline Vi

£149.00

- Connected via main telephone line to a monitoring centre.

&

- Alarm is raised via a trigger (e.g. a personal call button, a smoke detector etc).

13) Vi+ Unit -

£169.00

- All telecare equipment needs a Lifeline unit, but may connect to an existing unit if one is present.

Telecare

Tunstall

- Plus units have a clock, Can play back up to 6 pre-recorded messages over a 24 hour period, so working as a possible medication reminder.

14) Tynetec Reach &

£95.41

- Connected via main telephone line to a monitoring centre. Alarm is raised via a trigger (e.g. a personal call button, a smoke detector etc)

15) Reach Plus Alarm Unit

£117.74

- will accept up to 32 trigger devices

- Plus unit has a clock and can play back recorded messages, including medication prompts.

Telecare

Tynetec

16) Personal
Pendant - Touch

£36.16

The Personal Pendant is worn on the person to allow an emergency alarm call to be made from anywhere in or around the home. In residential housing calls can be made from anywhere on the scheme. An alarm call is made by simply pressing the red button once - a flashing red LED provides the user with call reassurance.

Telecare

Tynetec

NB Automatically provided if ordering #13,#14,#15 or #16

17) Tunstall
Smoke Detector

£56.00

Will alert client with alarm but also alert monitoring centre and fire service. This device should only be used where there is a need for linking to a monitoring centre

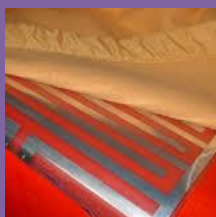

18) Tynetec
Smoke Detector

£44.97

NB needs #13,#14,#15 or #16

Telecare

Tunstall/
Tynetec

19) Tunstall
Enuresis Sensor

£55

Detects moisture. Lifeline Unit required. Can be linked to a pager or to call centre.

20) Tynetec
Enuresis Sensor

£40.60

Tynetec Enuresis Sensor comprises of a bed mat and an interface unit. The bed mat should be placed between the bottom sheet and the mattress with the cable plugged into the interface unit.

	21) Tynetec Enuresis Sensor cont		NB #20 needs #13 or #14 NB: #21 needs #15 or # 16
	Telecare	Tunstall/ Tynetec	
	22) Tunstall Heat Detector	£70.00	The wireless heat detector provides additional protection against the risk of fires in rooms where smoke detectors are unsuitable e.g. kitchen.
	23) Tynetec Heat Detector	£61.19	NB #22 needs #13 or #14 #23 needs #15 or # 16
	Telecare	Tunstall/ Tynetec	
	24) Tunstall Temperature Extremes Detector	£70.00	The temperature extremes sensor provides advanced alerts of (a) High temperatures, (b) Low temperatures, and (c) Rapid rise in temperatures. It also provides advanced warning of fire hazards, as unlike smoke detectors it can be sited in smoke rich environments such as kitchens.
	25) Tynetec Temperature Extremes Detector	£60.47	NB #24 needs #13 or #14 (PTO) #25 needs #15 or # 16
			

	Telecare	Tunstall/ Tynetec	
	26) Tunstall Carbon Monoxide Detector	£95.00	Provides an alert when dangerous CO emissions have been detected due to a blocked flue or fault in a fuel burning appliance. A blocked chimney or a faulty appliance can cause the products of combustion to back up and filter through the home leading to the risk of carbon monoxide poisoning and/or suffocation.
	27) Tynetec Carbon Monoxide Detector	£105.06	NB #26 needs #13 or #14 #27 needs #15 or # 16.
	Telecare	Tunstall/ Tynetec	

	28) Tunstall Flood Detector	£90.00	Provides early warning of potential flood situations. The sensor is placed under the sink or in the bathroom next to the toilet or under the bath. If the detector senses water, the unit provides two types of alarm. The first is a local audible alarm and the second will raise a call at the monitoring centre.
	29) Tynetec Flood Detector	£35.46	
	Telecare	Tunstall/ Tynetec	NB Consider # 1 before ordering this. NB #28 needs #13 or #14 #29 needs #15 or # 16.
	30) Tynetec Falls Detector (wrist worn)	£73.14	• Automatically detects a fall, can also be used to detect stumbles, trips or recovered falls. • emergency alarm call will be made via an At Home Alarm Unit or grouped system
	31) - Tunstall Falls Detector	£90.00	
	Telecare	Tynetec/ Tunstall	

32) Sensor
Controller -
ZXT450

£116.52

Telecare

Tynetec

Used with Bed Sensor # 12, If a person gets into bed then gets up again and does not return within the preset time an alarm call will be transmitted.

- Real time clock with auto BST update
- Configurable monitoring periods
- Quick setup function
- Carer call button
- Daily battery self test & low battery reporting

33) Universal
sensor

£110.00

Telecare

Tunstall

The Universal Sensor enables equipment to raise wireless alarm calls to home units. It can also be used to wirelessly connect Natural Gas Detectors to home units, as a Door Usage Sensor, or connected to a bed occupancy sensor mat to create a virtual sensor.

Special order: Easy link
GPS Tracker

<http://www.easylinkuk.co.uk/page104.html>

Special order
GPS Tracker Buddi

<https://www.buddi.co.uk/>

Consider Buddi for extra care housing or linked to a careline as their call centre will keep trying the contacts but if there is no response it will not be escalated to an emergency response. This could leave a vulnerable person at risk.

Special order
GSM unit.

Tynetech
Reach GSM Unit
(ZSA680) is
